Abstract

Shop And BId

Introduction

The core concept of this Shop And bid e-commerce website is to bring a whole new concept of online shopping.Shoppers have a wide variety of options both new products as well as old or used products.Used products are listed for bidding and anyone interested in purchasing the product will have to bid the product and win it.

The project consist of 4 modules, Admin,User,Manager,Bidding.Admin controls all the website,he also appoints manager.The User can purchase products and also participate in the bidding.The Manager and Admin can control the whole inventory of products both adding the product and managing the products and also lists the product for auction.
